

Mann Lake Ltd.

500 Watt Power Converter

Item Number HD-170

220/240 Volt \rightleftharpoons 110/120 Volt

Be certain that your selector (input) voltage is set to your power voltage. Using the incorrect selection may damage you equipment. A setting of 220 bolts for a 110 volt item will result in the output voltages being reduced to half the rated voltage. A setting of

110 volts for a 220 volt item will result in on output voltage 2 times greater than the rated voltage. A high humming sound will be heard. **DISCONNECT IMMEDIATELY!**

After the correct input voltage is selected, turn the unit on. Select the correct output voltage for your equipment, don not let it exceed the maximum capacity of the converter. Turn off the unit when it is not is use.
