

Zipper Veil Attachment

Lay the suit on a flat surface with the front of the suit facing you. There will be 2 separate zipper pulls on the neck of the suit, move both zipper pulls as far as possible to the left. The result should look like photo 1, with both pulls together on your right.

At the front of the veil (the largest square panel is the front) will be the starting point for the zipper. Place the bottom stop of the zipper into the zipper pull as far as it will go (photo 2), gently move the zipper pull to your right and the veil will attach to the suit as you go around the zipper (photo 3).

Bring the two zipper pulls together at the front of the suit, your veil is now attached (photo 3). To take the suit on and off, move the zipper pulls in opposite directions to about the shoulder blade area, this will allow the veil to stay attached to the suit but not be in your way.
