

## ProDFM

### *What is it?*

ProDFM is a Direct Fed Microbial formula which acts to naturally restore healthy bacteria in the bees' digestive track. ProDFM is a safe, beneficial choice for boosting your bees' immune systems.

### *Why use it?*

Bees' immune systems deteriorate due to exposure to pesticides, fungicides, herbicides and antibiotics. ProDFM revitalizes bees' immune systems while suppressing harmful pathogens including Chalkbrood, Foulbrood, and Nosema. Using ProDFM will help boost survival rates at a time when bees can be especially vulnerable.

## Using ProDFM

### *When to use:*

Feed ProDFM 3-6 times yearly

**Spring** - use prior to nectar flow

**Fall** - use while prepping for overwintering

ProDFM is safe for migratory moves and may be used during times when supplemental feeding is necessary.

### *How to use:*

Application Rate: Apply 1 Tbsp (10g) per hive. Sprinkle over the top bars of the brood chamber.

For Alternative Feeding: Mix 1 Tbsp (10g) with 3 Tbsp (30g) powdered sugar. Sprinkle over the top bars of the brood chamber.

Do not feed within 2 weeks of applying any antibiotic treatments for Foulbrood, Varroa, or Nosema.

Store in a cool, dry place.

## Purchasing

### *Where can I purchase ProDFM?*

ProDFM may be purchased through Mann Lake Ltd. or through Mann Lake's Authorized Dealers. ProDFM comes in 3 convenient sizes: 100 grams, 1 Kilogram, and 10 Kilograms. Mann Lake strives to promote healthy bees and offers a vast array of feeds, treatments, and supplements to suit your needs.

For additional information about ProDFM or any of Mann Lake's products, please call 800-880-7694 or visit our website at: [www.mannlakeltd.com](http://www.mannlakeltd.com)
