

Assembling Your Langstroth Hive Body & Super

What you will need for Assembly:

- 2 Ends
- 2 Sides
- Hammer
- Nails (sold separately)
- Construction Square

Hand holds facing up and out

Slide fingers together

Place nails into pre-drill area on fingers and hammer in.

Step One:

Take 1 side and 1 end and put the fingers together. Make sure your hand holds are facing up and facing out.

Step Two:

Put a construction square onto each inside corner of the box. Put nails into the pre-drilled area on fingers before nailing the final side/end. A box that is not square will not sit properly on the hive. Once square, pound in your nail.

MANN LAKE
WE KNOW BEES

501 1st St S, Hackensack, MN 56452
500 Santa Anita Dr., Woodland, CA 95776
485 Stewart Rd, Wilkes-Barre, PA 18706
1600 Commerce Street, Marshall, TX 75672

Step Three:

Repeat steps one and two.

*Once assembled you should treat the outside with a primer and paint.

You May Also Consider....

Metal Frame Rest:

Used to protect the wood from damage caused by scraping and hive tool wear.

Specialty Nails:

These cement and resin coated specialty nails are specifically designed with a small diameter to reduce splitting and cracking during assembly.

Perfect for the truly cost conscious beekeeper!
