PLANTING INSTRUCTIONS

Make sure that any existing grasses have been terminated prior to seeding. This mixture will excel when planted in the spring after soil temperatures exceed 55°F / 13°C, the seeds are sown on a firm seed bed with good soil contact, and the area receives regular moisture. This mixture contains both annual and perennial plant species that honey bees will love. Designed for planting zones 3-9, working the best in zones 4-8.
